tlusty.dev · pwn.college/hacker/183299 · tryhackme.com/p/TlustyTech

PROFILE

Passionate about embedded systems, reverse engineering and cybersecurity. I design PCBs in KiCad, write bare-metal firmware in pure C at the register level, and program microcontrollers. Experience in CTF competitions and commercial web deployments (TypeScript, Next.js, WordPress).

EXPERIENCE

Web Developer Intern

wasys.pl · Internship

- Deploying and configuring websites built on WordPress.
- Developing and customizing page templates and components (PHP, HTML, CSS).
- Supporting marketing activities and basic on-site SEO optimization.

PROJECTS

KittyCalc – Embedded Calculator · github.com/TomaszTlusty

Embedded calculator built on a Finite State Machine (FSM) architecture, written in pure C with no external libraries. Direct microcontroller register control and a custom I2C driver for an LCD display.

kiedywakacje.com · Next.js, TypeScript, Tailwind CSS

Original web application with an up-to-date school year calendar and a countdown to school breaks for students. Deployed to production.

TECHNICAL SKILLS

Embedded & Low-Level	C (registers, bare-metal), x86_64 ASM (basics), ESP32, AVR, I2C, SPI, UART
Hardware	KiCad (schematics, PCB), SMD soldering, 3D prototyping
Systems & Networking	Linux (Fedora, Arch), Bash, TCP/IP, Wireshark, Git
Security	CTF (pwn.college, TryHackMe), OWASP, vulnerability analysis
Web & Tools	TypeScript, Next.js, Tailwind CSS, Figma, Vercel

EDUCATION

Programming Technical School – Stanisław Staszic Complex of Schools in Tarnobrzeg

4th year · programming track

INTERESTS

Chess · Kickboxing · Systems architecture and physics

I consent to the processing of my personal data for the purposes of the recruitment process (in accordance with Regulation (EU) 2016/679 – GDPR).
